

**In order to become the same as Father Brahma, make your account of accumulation full.
(Pure inspirations of Dadiji)**

Sweetest Baba has given all of us children the golden key with which to increase our account of accumulation: “While doing service, always have the awareness of being an instrument”. By considering yourself to be an instrument, there will be the consciousness of being humble, good wishes and the feeling of soul-conscious love. By serving with this stage, the desires of many souls will be fulfilled. According to the closeness of time, all of us have to become complete and perfect, the same as Father Brahma. For this, Baba says: “Children, make a plan to save your time, thoughts and powers”. Just as you have lost everything by saying “mine, mine”, in the same way, say “mine is Yours” and make your account of accumulation full. Whatever were the thoughts and sanskars of the sakar form continue to check yourself against that and you will save time and the energy of the intellect that was wasted will be saved. Baba says: “Children, now put a full stop to wasteful expenditure”. Do not use too many powers for yourself too. Make a programme for your intellect, words and actions for every moment and spend according to that and your task will be successful according to your budget. For this, wake up at amrit vela and daily make a diary of what you have to do with your intellect, your words and your actions. This is the method for saving. Tell me, you have become a checker and a maker by paying such attention, have you not?

This time, on Shiv Jayanti, everyone celebrated with a lot of splendour and very good service took place everywhere. Hearing all of the news of this from everywhere, there is a lot of happiness. Just see how Karankaravanhar Baba is making His children instruments to do unlimited service. Wah Baba, wah! Wah Baba’s right hand children, wah! Blessings from the heart emerge for everyone. Everyone is tirelessly and altruistically engaged in the service of revealing Baba. Along with the service, we also have to make ourselves complete and perfect. Remembrance and service is the double lock that will make us into the conquerors of Maya and the conquerors of matter. So pay double attention and continue to always move forward.

All of you must be hearing the news of the splendour in our unlimited home Madhuban. It is now the season of double foreigner brothers and sisters to come. After a long time, senior brothers and sisters have come to Madhuban from all service centres across the world for the meetings. All together, they will make plans for self-progress and world service. The month of March that is coming marks the day of remembrance of both our sweet Dadis. Through Dadi Gulzar, all of us took so much sustenance from our beloved BapDada, I am sure all of you always remember that. Along with that, our Dadi Janki toured around the whole world donating her virtues and made many souls yogya (worthy) and yogi. Such sweet Dadis are always remembered in everyone’s hearts. Achcha.

I am sure all of you are enjoying good health. With lots of love and remembrance.

In Godly service,

B.K. Ratanmohini

Avyakt Signals – March 2023

Increase the account of accumulation – make a savings scheme.

1. Just as you accumulate the power of the mind through remembrance, when you sit in silence, “thought power” is accumulated. In the same way, make a scheme to accumulate the power of words and actions. The method to accumulate through words is “to speak less, to speak sweetly and to speak with self-respect”. In the same way, you accumulate in your account of service through actions when you perform any action being stable in a yogyukt and yuktiyukt stage.
2. Some children check themselves innocently thinking: “I have not made any particular mistake through the whole day, I have not had any bad thoughts, I have not spoken badly”. But they do not check whether they performed any divine or alokik actions. The divine thoughts, words and actions of the present time

accumulate for the future. So do not become happy thinking you did not waste anything, but how much did you make into best? It is fine that you did not cause any sorrow, but you accumulate by giving happiness, so to how many did you give happiness? Check yourself in this refined way.

3. Check all your accounts – how much did I accumulate through my body? How much did I accumulate with divine thoughts in my mind? How much did I accumulate through my wealth by using them for an elevated task according to shrimat? Pay special attention to the account of accumulation. If you have accumulated something, you will be able to give to others at the appropriate time. Otherwise you will be deceived at that time. To be deceived means to receive sorrow.
4. The golden key with which to very easily accumulate is: at the time of serving, have the awareness of being an instrument and have the consciousness of being humble, have good wishes and soul-conscious love. When you do service by being stable in this consciousness, you will easily be able to fulfil the desires of souls.
5. This confluence age is the age to accumulate and so check your account of accumulation. Be a checker and also a maker because we are seeing the scenes of the closeness of time and everyone has promised: “We will become equal”. So, in order to become equal to Father Brahma, your account of accumulation has to be full. Now make plans to save time, thoughts and energy and increase the stage of the point-form.
6. By saying “mine, mine” you lost everything. Now say, “Yours, Yours” and it will continue to accumulate. In fact, spending here also means to accumulate. However much you spend, that is, you give to others, so you create multimillions. Give one-fold and receive multimillion fold. Even one second of powerful remembrance enables you to accumulate an income of multimillions.
7. In order to save time and energy, continue to compare your sanskars with BapDada’s sanskars at every moment. Continue to compare yourself against the thoughts and sanskars of the sakar form and your time will not be wasted. You will instantly be able to decide what you must do and what you mustn’t do. In this way you will save time and the energy of the intellect that would have gone to waste would be saved.
8. Just as you make a programme for your physical activity, in the same way, make a programme for the activity of the intellect. Have the practise of asking yourself what activity you have to do with the intellect and then all the tasks will be successful at the right time. Perform every task while always being underground, that is, introverted and you will save time and thoughts and have greater success.
9. The Government has a savings scheme. So, the Almighty Government orders all the children to make a savings scheme. Put a full stop to all expenditure. Now, do not use your powers for yourself. You are the children of the Master of the unending treasures – maintain this intoxication and you will not have to take powers on loan.
10. The easy and elevated way to make a saving is to fix a programme for every moment for your intellect, words and actions. When a budget is made, they fix how much they are going to spend on one thing and they spend according to that and only then are they successful in doing everything according to their budget. So, to make a budget means to wake up at amrit vela and daily fix what you have to do with your intellect, words and actions. Make a diary for every day and do everything according to that.
11. You elevated souls now have to become world benefactors. For this, you have to have time and powers not just for yourself, but you also have to have stock accumulated for serving other souls. If there continues to be wastage, you will not experience yourself to be full. Therefore, be economical with the time and powers you need for yourself and save it because all the souls of the world are the family of you elevated souls. The bigger the family, the more you have to think of being economical.
12. Let the account of accumulation be so full that 21 generations are able to be always complete and your dynasty remains full of all treasures. Not just 21 births, but even in the copper age, because of being devotee souls, you will not lack anything. You have so much wealth even in the copper age that you are able to donate and perform charity very well. Look, even at the end of the iron age, though you don’t have impure wealth, you have daal and roti. So, whatever earnings you have accumulated at this time, you are accordingly eating daal and roti in the final birth.

13. In today's world, they make waste into best. They recycle the waste. So, all of you also have to constantly keep the account of savings in your awareness. Make a budget. How and where are you going to use your thought power, power of words, power of actions and power of time? Let it not be that these powers are wasted. Do not let your thoughts be wasteful or ordinary. Save these too. Always have powerful thoughts.
14. In order to save all the powers, make a chart for the whole day. The more you use all the powers, the more the powers will increase. To have a timetable of ordinary service or a timetable for running the household in an ordinary way will not be said to be a way of accumulating in your savings account. You did not speak wrong words, but did you speak such words that gave hope to someone who has lost hope or given courage to someone who has no courage? Did you bring happiness and zeal and enthusiasm in someone? This is accumulating or saving.
15. Make such a Godly budget that every soul in the world receives something and sings your praise. You definitely have to give something or other to each one, whether you give them liberation or liberation in life. A Godly budget means that all souls, including matter become happy and peaceful.
16. In order to accumulate all treasures, be tolerant. An elevated and tolerant soul will always be stable in the essence of knowledge and yoga and bring into essence all the expansion, problems and obstacles. When you have to go on a long journey, you use a lot of time and energy. Similarly, expansion is going on a long journey and essence is to take a short-cut. Both are able to make the journey, because one who takes a short cut save time and energy, he doesn't become hopeless or disheartened. He is constantly smiling and in pleasure on his journey.
17. Throughout the day, keep a chart of how much you spent and saved on your thoughts, words and actions. Now, make a special scheme to accumulate the powers of words and actions. The main thing is the mind, but along with this, also save through your words and actions because the mind (thoughts) is incognito, but words and actions are visible.
18. The bugle for the final completion has not yet been blown, and so fly and continue to make others fly. The method for this is to save all wastage. Continue to increase the account of savings and accumulation because, for 63 births, you have wasted all accounts and finished them. You lost all the treasures of breath, thoughts, time, virtues, powers and knowledge. So many treasures have become empty! So, now accumulate all these treasures.
19. Perishable treasures decrease as you use them - they diminish - and the more you use all of these treasures for yourself and others with a pure attitude, accordingly they will be accumulated and will increase. Here, using the treasures is the method for accumulating them. There, to keep them is a way of accumulating and here, to use them is a way of accumulating.
20. Use time for yourself or others in a good task and it will continue to accumulate. Use knowledge for a task. In the same way, the more you use virtues and powers, they will increase. Do not think like when they put everything in a locker and think they have accumulated a lot, that you also think that you have a lot of knowledge in your intellect, that you also have a lot of virtues and powers. Do not keep them locked up. Use them.
21. On the path of devotion, they have the discipline that however much physical wealth you have, if they donate from it and use it in a worthwhile way, it will continue to increase. In devotion, people have so much zeal and enthusiasm to use everything in a worthwhile way. So, you too have to check: "How much have I used all the treasures in a worthwhile way?" Spend (use) the treasures less, but have greater attainment from them. The success or attainment an ordinary person is able to achieve after thinking about it for two to four minutes, you are able to achieve that in two seconds. In sakti, Father Brahma used to say: Let there be less expenditure but greater glorification". Spend less but have hundred fold attainment. Whatever time and thoughts you are able to save through this can be used to serve others.
22. Only those who have saved wealth are able to donate and perform charity. If you have earned only as much as you need for yourself, you will not be able to donate. Only when the result is greater in a short time or when you have a greater experience through fewer thoughts will you be able to use every treasure for serving others. Similarly for words and actions, when you spend less and have greater success will it be said that it is a wonder.

23. If you pay attention and save something, then even if it is just a small saving, there will be extra happiness. If you were going to spend £10 or \$10 and you came back with a saving of £1 or \$1, then there will be a lot of happiness that you saved £1.
24. First of all save your thoughts and instead of wasting them, accumulate them in the account of best. Secondly, if you are unable to save, then transform waste thoughts into powerful thoughts. If you are unable to control them, then transform them and change their speed. Otherwise, a habit is formed. If you even accumulated 5 minutes waste into best, then in 12 hours, how much would you have accumulated even by accumulating 5 minutes each hour? And how much happiness would you have? The more elevated thoughts you accumulate in your account, that account of accumulation will be useful at the appropriate time.
25. If you are unable to accumulate physical wealth, then you will be deceived at a time of need. Similarly, here too, if you haven't accumulated the treasures, then when a big test paper comes, the mind and intellect will seem empty and you won't have power. So, learn to accumulate. Let your account of elevated thoughts be full, not empty. This treasure of elevated thoughts will be the basis of your elevated reward.
26. Every night, check your chart of the savings of these treasures. How many thoughts and how much time did you accumulate in your account of best? How many elevated tasks did you perform with your virtues and powers? So, check your chart of thoughts, time, virtues and powers every night and then see how much you accumulated in total. This saving will help you and also help others. When you pay attention to saving, you won't have to work hard.
27. Always check: How much charity did I accumulate today with my mind or with any service? And on the basis of charity, how many trivial things were finished? How much did I spend and how much did I save? If obstacles come again and again and I use my virtues and powers to finish them, then how much did I use? By being yogyukt and doing service by making the Father my Companion, how much charity did I accumulate? Set such a machinery of checking in the office of your heart and continue to check, and then change will take place.
28. Whatever elevated tasks you want to perform, you have to do that now. In every task, always remember at every moment: If not now, then never. Those who are aware of this all the time will not allow themselves to waste their time, thoughts or actions, but will continue to accumulate them all the time. So, knowing the importance of every thought at every second, make your account of accumulation full and you will be able to make your account elevated.
29. Those whose service centre and service is free from obstacles, those who are free from the conflict of nature and sanskars are able to accumulate in their account of service. If a centre grows and at the same time, Maya also increases, then such service cannot be accumulated in the Father's register. Some think that they are doing a lot of service, that they don't even sleep, that they cook food only once and eat just that and remain so busy. But along with service, if you are busy with Maya thinking "What happened?", "How did this happen?", "Why did this one do this?", "Why didn't I do it?", "my right", "your right", such service cannot be accumulated.
30. Power to reveal the Father will come in your words when you save them from being wasted. Until now, there are more ordinary words and this is why it is taking long for the loud sound to be heard. Just as Father Brahma's words were like words of an angel, he spoke few words and spoke sweetly. Similarly, speak accurate words. You may have to speak for your business activities, but do not let there be too much speaking. Now, accumulate your power and only then will there be power in your words.
31. Now, use your time for effort to help others and your effort will automatically be accumulated. To help others means to accumulate for yourself. Now, spread such a wave: give, give, give and give. Those who give receive blessings from everyone's heart. The effort of those who accumulate blessings from everyone's heart automatically becomes easy. Just as you keep a stock of everything according to how much you need, in the same way, you now have to check the accumulation of this stock. Along with that, wake up at amrit vela and make yourself move along the rails of attention, and your train will move along well on the rails.
